! Warning

Please read the assembly instructions included carefully. Please read this iPad wallmount user manual completely before using it. Please follow the instructions and recommendations to ensure proper use and maximum enjoyment.

Safety information

All viveroo mounting sets are intended for use in enclosed and dry living spaces.

The following conditions must be provided:

- Operating temperature between 0° C (32° F) and 35° C (95° F).
- Relative humidity (during use): 20 % to 90 %, non-condensing.
- No external environmental influences such as oil, chemicals, salt, extensive dust, etc.

Installation, service or repairs, if necessary, may only be performed by authorized persons.

The maximum altitude is 2.000m.

The installer is responsible for selecting the proper mounting location and safe installation of the one. This also applies to installation in movable parts, such as doors. The installer is responsible for performing and documenting all necessary safety tests.

All electrical installation work may only be conducted by authorized, trained electricians, always adhering to the general rules and regulations applying to electrical installation.

Should it become apparent that safe operation of the one is not assured, then the one must immediately be taken out of service and secured against potential misuse. If the one functions are limited, blocked or disabled, if an unusual odor is present, if noises such as scratching are audible or damage is visible, safe operation can no longer be guaranteed.

Technical changes and mistakes are excepted.
 Apple, iPad and Lightning are registeres tradem geschützte Marken von Apple Inc.

Use the corresponding MountingSet to install your one. All MountingSets come with specific mounting instructions. Illustration are examples. Depending on the iPad and USB port, another power adapter and cables can be supplied.

Step 1 one can be either installed vertically or horizontally (see installation guide).

! Important: This installation guide shows the installation process for Inwall mounting with flush-mount box (MountingSet Inwall). Here, one is installed in landscape position.

If you are going to fix the one without a flush-mounted box and directly to the wall, please continue with step 2.

For USB-C: Insert the USB-C cable in the USB-C power supply in the wallbox now. To do this, please remove the black mounting plate from the wallbox to have access to the power supply.

Put the one on the wallbox. **For USB-A:** Feed the USB-A socket out of the box to the front. It makes installation easier and the cable can be connected later.

Fix and secure the mounting plate using the supplied screws (2.5mm hex). Tighten the screws lightly at first. Then you can adjust it to its final position using a level. Now tighten the screws.

Step 2 Now put the felt points onto the outer screw holes. The felt points serve as a protection for the iPad. It is not necessary to cover the inner screw holes for the wallbox mounting. The screw head cannot come into contact with the iPad.

Step 3 Now connect the USB cable to the power supply.

Step 4 Insert the iPad. First slide left under the aluminum lip and then press on the right. Then connect the iPad to the charging cable and return the remaining cable to the wallbox.

Step 5 Finally, put on the cap and fasten it with the enclosed screws.

PoE Splitter for iPads with Lightning connector.

PoE Splitter for iPads with USB-C connector.

Note: Use the orange wall box and mounting plate to attach the viveroo iPad mount to the wall. Lay the white PoE splitter outside the box, as it can get very hot at high load. Please also note the enclosed instructions of the PoE Splitter. We recommend to put the installation box into a bigger installation box or in a cavity wall with enough space.

Warranty

Warranty

viveroo products come with a one year warranty from date of purchase by the original end customer, unless the device was repaired or replaced during the warranty period. In this case, the warranty is valid until the end of the regular two year warranty or six months following the repair/replacement, whichever comes first.

Warranty claims and verification

Should your viveroo product for any reason not perform as expected, please contact your dealer and provide the original invoice with serial number as well as a brief description of your complaint.

Warranty claims and verification

The following devices are excluded from the warranty

Devices with damages caused by:

- acts of nature,
 - misuse, including but not limited to disregarding the user manual and mounting instructions,
 - inappropriate handling,
 - connection to an incorrect power supply,
 - repairs or attempted repairs by unauthorized persons,
 - use of the device in connection with third party products,
- devices on which the serial number of the producer has been changed, deleted, removed or made illegible.
